

Functional Characteristic of the Rejuvenizer Portable Water Ionizer

1. Improves nutrient absorption, heightens immunity and boosts metabolism.
2. Changes regular tap water into rejuvenated, activated water rich in elemental minerals such as calcium, potassium and sodium.
3. Creates a rich anti-oxidant water which promotes overall health.

Benefits of Rejuvenized Water

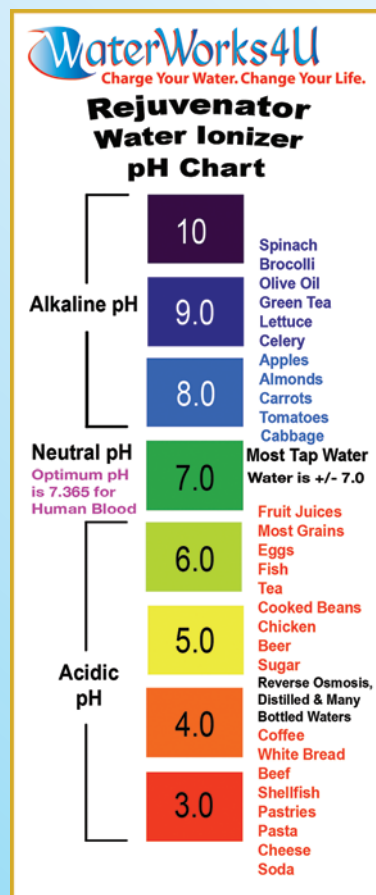

1. Rejuvenized Ionized water gives you lots of energy and enhances mental clarity.
2. Washes acidic waste, toxins and excess fat from the body.
3. Increases the effectiveness of digestive enzymes allowing the body to naturally eliminate fats.
4. Hydrates the body 6 times more effectively than regular tap water.
5. Allows for more efficient nutrient absorption.
6. Negatively charged water (ORP) deters free radicals.
7. Helps to reverse the damaging effects of excessive alcohol and tobacco consumption for those who quit smoking and drinking.
8. Prolonged use supports kidney health in an effort to prevent renal failure.
9. Neutralizes acidic toxins in the bowels, eliminating dysporia.
10. Prevent acidosis and balance one's system. Neutralize excess gastric acid, protecting against gastritis.

Instructions

1. Before using the cup for the first time, you will need to clean the inside of mineral sediment and activate the Nano-Particles. Pour hot water (at least 90 degrees F) into the cup (fill up more than half way), replace the cap and shake. Wait until the water has cooled then pour out. Repeat two more times.
2. After cleaning, you are ready to use the Rejuvenizer. Pour in tap water, shake for 60 seconds and wait for 10-15 minutes. Enjoy.

Suggestions

1. It is recommended that you drink 1/2 your weight in ounces of water every day (Ex. 160 lbs = 80 ounces of water)
2. After the first month, you will only need to wait 1 minute before drinking. After 2 months, wait 3 minutes
3. Sometimes, mineral sediment is left over in the cup. Simply clean it out with hot salt water.
4. Purified water has a stronger acidity and may require a longer filtering time.

REJUVENIZER

HYDROGEN RICH ALKALIZING BOTTLE

INSTRUCTIONS & CARE

Turns Tap Water into a Powerful Anti-Oxidant for Wellness, Weightloss & Anti-Aging

www.WaterWorks4U.com

WaterWorks4U
Charge Your Water. Change Your Life.

The Rejuvenizer "Never Leave Home Without It"

The WaterWorks4U Rejuvenizer turns regular tap water into mineralized alkaline water for **Wellness, Weight Loss And Anti-Aging**.

The activated water is comprised of restructured water molecule groups (hexagonal in shape) with a negative ORP and high alkaline value (9.5+pH). It creates living crystalline water.

Mineralized alkaline water helps to expel free radicals, aids in reversing the damaging effects of excessive alcohol and tobacco consumption (for those who recently quit smoking and drinking), improves nutrient absorption and boosts metabolism and immunity health. Continuous consumption of alkaline water has been shown to eliminate acidosis from the body, balance body pH and aid in the prevention of senility, high blood pressure and gastritis.

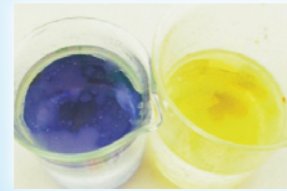

Purified water created by distillation and reverse osmosis is normally very acidic. Regular tap water is generally neutral and contains very little of the healthy minerals the body needs. Long-term use may negatively affect a person's immunity and health.

Life time:

1 year, then change filter.
If you find sediment in the bottle, clean it out with hot salt water.
Wash it once each month.

The Testing Method

1. Take 1 cup of common purified water and 1 cup of mineralized alkaline water. Add 1 drop of pH tester into each cup. You will notice that the purified water has become yellow (the pH value is around 5.5) and the mineralized alkaline water is blue (the pH value is around 7.5 – 9.5).

2. Test the affinity with edible oil. Take 1 cup of common purified water and 1 cup of mineralized alkaline water. Pour into each cup an equal amount of cooking oil and stir. The oil will float on top of the common purified water but will mix with the mineralized alkaline water.

3. Test the detoxification properties. Take 1 cup of common purified water and 1 cup of mineralized alkaline water. Add 1 drop of iodine to each cup. The common purified water will turn yellow but the mineralized alkaline water will remain clear as it neutralizes the iodine.

4. Test the ORP value. Oxidation Reduction Potential (ORP) is a measure of a water system's capacity to either release or gain electrons during a chemical reaction.

Features:

1. Alkaline Water: balances the human body's acidity levels.
2. Negative ORP: is a strong anti-oxidant which removes free radicals, enhances immunity and metabolism and works as an anti-aging agent.
3. Added Beneficial Minerals: provide the body and it's systems with needed minerals for healthy development and growth.
4. Restructured Molecular Shape (Hexagonal): has stronger absorbability and oxygen affinity, which enhances nutrient absorption and carries waste and toxins from the body.
